

6-5-2012

To whom it may concern,

I write this letter of recommendation on behalf of Greg Roover, of Claim Concepts, a public insurance adjuster who specializes in obtaining fair claims for private individuals and corporations after and sometimes before insurance claims are denied by major insurance companies.

I own and operate a midsize general contracting firm in Jupiter Florida called Onshore Construction and Development, Inc. We build from the ground up turnkey single family home projects that cost to build from 1.5 million to over 26 million dollars. Obviously, I and my clientele, in these types of homes have claims, many of them large claims, due to the cost of the finishes installed in these projects.

I have known Greg for more than 5 years both socially and professionally. I find his character to be 100 % pure and honest. I also find his abilities as a public adjuster to be second to none as I have the need for this type of service on a consistent basis being in the field that I am in. I find Greg diligent, persistent, unrelenting, and knowledgeable. He has worked as a claims adjuster for large insurance companies and totally understands how to navigate both sides of the fence to produce the desired outcome for his clients. I have not had Greg Roover work on a claim yet that I felt the results were unsatisfactory.

I recommend Greg Roover wholeheartedly for producing fantastic results in the public adjuster arena.
